COMP-LINE™
SERIES EXP
EXPANDED METALS

Description

The COMP-LINE™ Series EXP Expanded Metal is utilized as both a structural and filtering component in a wide variety of commercial and industrial air filters. Metal washable type, pleats, and other filters incorporate expanded metals. Processed to exacting tolerances using only the best grades of materials, Series EXP Expanded Metals are available in aluminum or galvanized and with varying styles and sizes of diamond patterns. These bulk rolls are processed in 4 standard filter sizes. Special custom sizes are also available.
