# ACCESS-LINE™ SERIES FXL FIXED LOUVER

## Fixed Louver

The ACCESS-LINE™ Series FXL Fixed Louvers may be added to any of BLC's side access housings as an effective system to prevent rain and unwanted debris from entering the air stream. Angled fixed louvers and an internal birdscreen allow reliable protection of air filters, increasing their performance and prolonging their life.

- ANGLED, FIXED LOUVERS
- FIXED BIRDSCREEN INCLUDED
- DESIGNED FOR OUTDOORS

### EQUIPMENT OPTIONS

- STAINLESS STEEL
- EPOXY COATING
- SPECIALTIES
- CUSTOMIZATION

*These and other specialty options are available, please contact factory for further information.*

## For Vital Protection against Rain & Debris

The ACCESS-LINE™ Series FXL Fixed Louvers offer a simple deterrent for unwanted rain, snow and any other large debris from entering the air system. Manufactured to the exact dimensions of the common sizes of side access housings, the FXL Fixed Louver is a guaranteed match to complete your air filtration system.

The FXL Fixed Louver is constructed of 16 gauge aluminized steel and is provided with 1 1/2" mounting flanges on both the air entering and air leaving side of the unit. The stationary, angled louvers are preset at a pitch to guard against direct entry of rain or snow.

The ACCESS-LINE™ Series FXL Fixed Louvers are manufactured with an internal birdscreen. The birdscreen has a 1" by 1" opening, adding virtually no resistance to air flow, while at the same time keeping out birds, leaves and other large unwanted debris.

The ACCESS-LINE™ Series FXL Fixed Louvers offer of an economical choice for shielding the air intake to the air filtration or air purification system; helping to keep the filtering media dry and clean and prolonging the natural life of the air filters.
