# ACCESS-LINE™ SERIES MAU

CUSTOMIZED MAKE-UP AIR UNIT

## Make-Up Air Unit

This particularly Customized HEPA Make-Up Air Unit provides an air-intake Weatherhood, a Blower Housing, and a HEPA Housing – all weatherproofed, epoxy coated (optional), and on rails. BLC's ALMAU is 100% factory assembled: it needs only contractor wiring and duct installation when received at the job site. This rugged, durable construction is simply one of many customized air units built by BLC to engineer/contractor's specifications and shipped flatbed truck direct to a job site for immediate, crane installation. With coordinated, "just in time" delivery, one-touch installation, plus quality and economy, BLC saves its customers costly labor, time and money on job sites.

- FLANGE ADAPTERS
- SUPPORT LEGS
- ON-BASE RAILS
- EPOXY COATING
- STAINLESS STEEL

*These and other specialty options are available, please contact factory for further information.*

## For Most Any Custom Application

#### Odor Removal Purification Systems

The ACCESS-LINE™ Series MAU Make Up Air Units are perfectly suited for a variety of odor removal applications. Designed as a factory assembled system; blower, prefiltration, carbon or potassium permanganate media, etc. the Series MAU offers a complete air purification solution. **Multi-stage Air Filtration Systems**

The ACCESS-LINE™ Series MAU Make Up Air Units may be arranged with almost an endless variety of pre and final filtration to achieve the desired result with the best configuration. By incorporating the blower, you can be assured that air filter pressure drops will not be a problem.

#### High Efficiency HEPA Filtration Systems

The ACCESS-LINE™ Series MAU Make Up Air Units are an excellent choice for adding high efficient HEPA filtration. By being able to choose the level or degree of prefiltration and with the added guarantee of a properly sized blower, HEPA filtration (completely assembled) is an order away!

#### Air Re-Circulation Systems

The ACCESS-LINE™ Series MAU Make Up Air Units, however configured, offer a significant advantage over simply exhausting untreated or marginally filtered air. The ability to return and re-use conditioned air will save on expensive heating and cooling costs.
